Reason:

The recall is done because the the Gilleleje Spaghetti Spoon in a sample testing doesn't comply with the requirements in EU regulation 10/2011 on plastic materials and articles intended to come into contact with food. The other products in the range made of the same material are recalled at the same time, as a precaution since they can be affected as well. The food authorities are informed about this recall.

We have conducted the mandatory tests on these article before they were introduced on the market, where all articles passed within the required limits. Therefore we are now investigating the reason why these sample tests come out with a different result.
